

I wanted to comment on the LPFM issue which is at hand. It would be a shame and a great injustice if AIR 1 was to be removed from the airways. It is the only station in the area to play contemporary christian music and offer an alternative choice to the same type of music that is heard over and over again on every other station owned by these giant corporations. It is also somewhere young adults and teens can turn to to listen to music not filled with lude lyrics and profanity. It is also a station people can turn to to find guidance and direction when they fee lost, since the station does offer prayer if needed. I think its ridiculous if a station that is listener supported would even have this issue. The people that listen to it support the station! I think that in itself is a statement to consider, how many can make that claim? Please consider all of this when making your decision that hundreds even thousands of people will not have a place to turn to listen to quality music that is not dictated or run by Corporate America.
